

Recycling stations for sorted waste \*\* and Hazardous waste

**CONTACT LIST \*\*\***

Emergency: 112

Port of Gävle: +46 26 17 88 66

\*\* Related to: MARPOL Annex V, Regulation 7, MARPOL Annex V, regulation 5(4) Important to have an easy access to recycling stations

\*\*\* Related to: The importance of resolving any questions fast, thereby not giving the opportunity to regress to old behaviour (i.e. not recycle)

# Welcome to the Baltic Sea and the port of Gävle

Waste Management

**Gävle Hamn**

For your convenience all ports in this area regulated by the Helsinki Convention are equipped and work in a similar manner<sup>1</sup> when it comes to sludge and waste handling. They are running according to a “no special fee”-system<sup>2</sup>. This means that a fixed fee will be added to your harbour fee irrespective of whether waste or sludge is delivered or not.

We would like to inform you that all disposal of waste into the sea<sup>3</sup> as well as incineration<sup>4</sup> onboard is prohibited. In general, you are always obligated to discharge all ship-generated wastes, including sludge, to the port reception facility, before leaving port<sup>5</sup>.

Please make sure that your equipment is suitable for discharging sludge at a minimum of 5 m<sup>3</sup>/h in accordance with current regulations<sup>6</sup>.

For more information please visit: <http://www.helcom.fi/>

We hope that you will have a pleasant stay and a safe journey. If you wish to deliver waste or sludge please notify the port 24 hours in advance<sup>7</sup> using standard form available at [www.balticmaster.org](http://www.balticmaster.org)

1 Related to: Helsinki Convention, Article 8.2

2 Related to: Helcom Recommendation 28E/10

3 Related to: Marpol Annex V, Regulation 5(2)

4 Related to: Helsinki Convention, Article 10

5 Related to: Helsinki Convention Annex IV, Regulation 6

6 Related to: Marpol Annex I, Regulation 13

7 Related to: Helcom Recommendation 23/1

**Other hazardous substances:**

If other hazardous substances not found in the categories to the right, the receiving harbour must be informed 24 hours before arrival. Information that should be given is type of waste, amount, state (solid, liquid, gaseous) and precaution measurements if necessary.

\* Related to: Important to have clear and easy instructions, thereby making it easy to create the habit of recycling

## Recycling procedures\*

When visiting our reception facilities you are required to follow these procedures:

- Deliver sorted waste to the recycling stations shown on the map
- Hazardous waste containers must be tightly closed and permanently marked
- If the waste is inappropriately sorted, the vessel will be invoiced in accordance with the additional costs caused by further waste treatment

All of your ship generated waste shall be recycled in the following categories:

| Hazardous waste  | Non hazardous waste  |
|--|--|
|  <p><b>Batteries</b></p>  |  <p><b>Plastic packaging</b><br/>such as bottles and foils.</p>   |
